

2LT to 2.5LT Adrenaline Red Interior

Love the Adrenaline Red Interior in my 2LT Artic White Grand Sport. However, felt in needed some red on the dash.

The 3LT has a bit too much red, IMO. But design is very subjective.

After looking at the upper dash pads offered for sale, thought that would be just the right amount of Red on the dash.

There are several sources to purchase this GM part. On eBay, the least expensive from a known reliable Vette parts vender, GS Creations. There price was \$320 delivered. In addition to finish off the passenger grab handle a matching lower dash parts were ordered on eBay from Suburban Chevy for \$75.

Investigated adding the Red Adrenaline thin “spear” on the driver’s door that is an extension of the upper dash pad. That turned out not to be easy! In fact, called a GM Parts vendor at a Chevy dealer and the representative thought he found the part from a 3LT Adrenaline Red parts breakdown. Fortunately, was able to quickly stop the order when I found out that same part number is listed for all color 3LT interiors! It is the plastic part with no leather that must be added!

A company that specializes in interior parts will take the long thin “spear” from my car and replace the black leather/vinyl with properly stitched Adrenaline red leather but

the cost is \$290 plus shipping and there is a question about installation. Found a \$10 solution and 10-minute install! Details at the end of this picture install.

This is a pic of the as built 2LT with black upper dash pad.

Perhaps the easiest mod I have made on my C7 2014 or new Grand Sport. Suggest you watch the first 1.5 minutes of this video. It covers the removal, which is mostly done by hand!
<https://www.youtube.com/watch?v=SIG75ze2Udc>

I did the same. After removing the lower Dash parts that require a 25 Torx bit and one insertion of a plastic trim tool it's all "pull gently" to remove the clips.

This pic shows the Black upper dash Pad removed and the Red ready to install. Just used the side on my closed fist to tap the clips in place.

Could have removed the Black grab handle cover before inserting the red upper dash panel but no problem. A plastic trim tool makes quick work of removal.

Once the black is removed the red simply snaps in!

The finished assembly looks great!
Just needs something for the driver's door to be perfect.

Now the question, Does it need the Red thin spear on the driver's door to finish it off?

Looks like the only company to offer a solution is Apsis who will replace my Black spear with Adrenaline red for \$290.

I called to see what they believe is needed as some said the whole door panel needs to be removed to access some bolts that hold it in place.

I was told they only have replaced the leather and had not actually done the swap.

However, they have picture (below) that indicates the know removal of the whole door panel is not required. They post this on their website but frankly after talking with them-I'm not sure.

Although the statement on top that the pic says it can be removed without removing the door panel, have had a different statement. It can't.

Even Apsis, who changes the leather, could not say how it comes off, they just replace the leather on a part a customer provides!

And when it is is removed, will it go back aligned. Several have of posted where a new car was delivered without it aligned and dearlers have not been able to fully correct!

Other have commented on the

hread that thy have some issues a well.

Found a cheaper foolproof solution, outline below.

Risk if Door “Spear” is Replaced.

Several posters commented on how their door “spear” was not aligned properly from the factory! Dealers were not able to fix it to their satisfaction.

Considering how it is attached, between other door panels sections, the removal, they having the leather replaced and stitched to match the OEM, it could be difficult to align when replaced.

Would not want to invest ~\$300 and whatever it takes of remove and replace and then find that the “spear does not align properly!

Note in this posters case it misaligned both horizontally and vertically!

If the parts are not aligned perfectly the stitching will quickly point it out. This poster said his was just aligned horizontally but is very easy to see the mismatch.

Mr. Blue posted this inexpensive mod that provided the idea for a possible inexpensive solution to the seat colored door “spear.” He placed this red plastic molding in a number of areas in his Adrenaline Red 1LT. He installed one strip on the “spear.”

EJ's SUPER CAR 3D DIY Automobile Car motor Interior Exterior Decoration Molding Trim Strip (5 meters, Red)

By EJ co., LTD

Mr. Blue found the product pictured left and showed how he installed on his Adrenaline Red 1LT interior! More red than I needed but would it work on the drivers door?

For \$10 for 15 feet on Amazon, worth a try!

Worked Great! Easy install and the color was a very good match to the Adrenaline Red Vette interior. Can see in these pics it came very close to matching the red stitching and 3LT leather!

The install was very simple. The product came with a tool to spread the seam where it will fit, you can see in yellow in the pic above, but it was not needed. The bottom section of the TEE is thin so slipped easily into the gap between the parts. Put it on both sides of the “spear. Fits tight. The fit at the very end was a little loose but, if needed, a drop of glue applied with a toothpick will hold it in place.

Wife liked the look and said, “Why not add it to the passenger door!

Took only a minute and it was done! She approved. Frankly she is a much better judge than I!

Of interest the 2018 Vette 2LT includes the 3LT seat color upper dash pad. Assume it also includes the seat color door “spear.”

Other 2017 Grand Sport & 2014 Stingray PDF's Available:

Some 40 items discuss improvements or information about a 2017 Grand Sport and 2014 Stingray function and/or esthetics. Some are minor and others, like the installing ceramic brake pads, include detailed install information.

Below are the PDF's available. Click on picture (may need Ctrl pressed.) Or just copy and paste the PDF info (Blue type) into your browser. Or email me at GUtrachi@aol.com and state the title desired, shown in Yellow:
